

Aprehend®

Ready to use

Kills bed bugs...field tested and proven to work!

Sold only to professionals, Aprehend® is a revolutionary fungal biopesticide for the elimination and prevention of bed bugs. Spores transfer easily among bugs, including those that don't leave the harborage. The fungal disease kills bed bugs in 4 to 7 days and prevents new infestations for up to 3 months.

RESULTS ACROSS THE NATION!

- Bed bugs completely eradicated from 32-apartment complex, winning PMP annual contract
- PMP operational costs reduced 60% by switching from chemical protocol to Aprehend®
- Long-term, resistant infestation solved in ¼ the time chemical treatment would have taken
